

Coffee Grinder Plans #1141 - 1142 & 1144

Typical Coffee Grinder Base

NOTE: All dimensions can be changed to suit the individual's unique needs.

Drawer sides: Make from 5/16" stock with a 1/8" slot cut 1/8" deep at 3/16" from the bottom, to accommodate a 1/8" thick bottom piece, slid into the slot.

OR Cut a 1/8" board to size and secure to bottom of drawer, don't forget to reduce the height of the sides and back by 1/8". Cut the length depending on the type of corner joint, to measure a total of 5" when assembled.

Drawer front and back: Use 1/2" stock, cut 4-7/16" wide and 1-7/16" tall – final dimensions.

Note: The size of the coffee grinds are determined by an adjustment at the top of the mechanism.

Kit includes: Adjustable grinding mechanism, crank wheel, and mounting hardware.
